

Sept., 23, 1927.

DeForest Radio Co.
139 Franklin St.
Jersey City,
New Jersey,

Gentlemen;

The Milwaukee Radio Amatuers Club Inc., will as usual have an exhibit at the coming Radio Show to be held in this city on the 4'th to the 6'th of October. This will consist of a complete HAM station with a 150 Watt Transmitter and a Short Wave Receiver on 40 Meters with the usual free message service to all, and will be on the air about 8 hours daily.

The Club will be pleased to exhibit any and all parts of apparatus of your manufacture that can be used in the construction of such a station and which you may be able to donate for that purpose. This equipment will then be installed in our Club rooms and be a permanent ad for you.

We would be particularly interested in obtaining one of your new type H 150 Watt tubes.

May we add that at the last years show our booth created a wide interest and was commented on very favorably by hundreds of people. The Everready Battery Co. used a full page cover ad in relating our activities at this time.

Thanking you in advance for any favors you may be able to bestow on us, we are,

Yours Very Truly,

The Milwaukee Radio Amatuers Club Inc.

Secy.-Treas.
